	Freshly weaned calves being worked the first few times at assessment. Normal behavior for weaners. Worked very well through the yards and should be quieter to handle by delivery. Not assessed in the paddock (vendor comment - any poor temperament cows are culled). Ones that were slightly stirry in the crush settled immediately upon joining the mob.

Assessor Comments	Quality line of the vendors annual draft of weaner steers, grazed on natural forest country and will do the job for most markets. Majority blacks with a few colours as represented in the photos and video.
