Very Good	100%

Assessor Comments	Excellent quality line of NSM Poll Merino classed in ewes. Ewes have very good genetics bred into them with the Cusack family annually acquiring rams in the top 50% of the Bundilla ram sale. They show good conformation and type and would be equally suited to a merino or terminal sire. These ewes are bred from a high fertility flock and have done a tremendous job on their lambs over the past 3 years with weaning percentages of 120-130%. Flock carries great growth with the wether lambs by these ewes finishing at 68kg avg at 11 months of age. These ewes would generally be joined for another lamb but due to another high weaning, are now offered for genuine sale. Ewes have been udder checked and present in sound condition for their age and any faults removed.
