Three cows were mildly agitated and 5 cows highly agitated leading upto the crush, in the crush or exiting the crush. The balance moved through the crush in an orderly fashion. In the yards they all settled quickly. However three head did not like any pressure and would bury themselves in the back part of the mob. They were not stirry but would move away from any human pressure.

| Assessor Comments | A line of 26% fair quality, 41% good quality and 33% very good quality PTIC cows. They were Vet preg tested in calf at assessment as 8 - 16 weeks in calf. They were joined to three Mooroobie stud Angus bulls with the bull individual ID's listed in the assessment. The cows range from 26% small frame through to 37% medium and 37% large frame. All these cows were vendor mouthed in April 2022 with 9 x 2 T, 4 x 4T, 3 x 6T, 8 x 8T at that time. All the 8T cows were remouthed at assessment with all sound 8T cows (see photos). Based on dentition it is estimated that 65% of the cows are 2 - 4 years old with balance 6 - 8 years old. Eyes, feet and udders all appeared sound and in line with the age of the cows. These cows are being sold as they are outside the vendors preferred calving window. They suit to take and put away with the cows to throw soft crossbred calves in an autumn 2023 calving. |
