Handled With	Bikes , On foot , Vehicles		
Assessor Comments	Quality Hereford cows at the peak of their breeding years that will calve in Feb/Mar next year to Connemara Angus bull. Cows currently have big, sappy calves at foot that will be weaned at delivery. Years of Glentrevor genetics have created cows with volume and milk to churn out heavy calves sold at Yea's January weaner sale nudging 400kg. Cows must make way for sheep as a better grazing balance on newly purchased property. 3 cows observed with one long back toe (nothing lame)
