Buyers here is a line of well educated heifers. A small percentage become slightly stirred up in crush settled once returned to mob. A lot of effort has been put into these steers during the weaning process with most of the work being completed by a lady and children.

Handled With Bikes , Dogs , Horses , Vehicles

Assessor Comments Buyers here is a good line of fully weaned Angus cross heifers that averaged 275 kg after 12 hours in the yards. These heifers are ready to fire, plenty off frame and pick up to take onto heavier feedlot entry weights. Would be usually taken onto heavier weights by the vendor but need to make room for the next lot off weaners in the coming months. Please note a small percentage have a small blue spot in one eye and or buffalo fly rub around eyes and neck, none off these blemishes seen to be detrimental.
