Assessor Comments: A neat line of 13 PTIC Angus Heifers that are due to calf in August/September. These heifers are medium to large in frame and are Feb/March 2022 drop making them a tick over 2 years old. They were joined to a Pathfinder Bull, giving them quality breeding genetics which are sure to drop great calves. These heifers were a pleasure to assess with only one presenting slightly stirry, while the rest were quiet and went through the crush with no issues. They also were quiet while being preg tested. These heifers are Vendor bred, it is a regretful sale as the vendor has elected to move into an Autumn calving program. A great start up herd or herd extension to suit any operation.
