Steers were very good to handle and worked freely through the yards, one steer became unsettled during weighing but settled once back in the mob. Typical of young cattle, a settling in period would be beneficial.

Assessor Comments

Buyers, an opportunity presents itself to purchase a neat line of 16, good quality weaned Angus & Angus infused steers. These steers present in good store condition and will offer plenty of compensatory weight gain once settling into their new environment due to having been fully weaned & handled. Steers show all attributes to make great future feeders or bullocks, and will excel on grass, crop, or grain. Buyers please note, one steer presented to have small warts around eye at assessment. This is a rare opportunity to grab a line of weaned black steers for your operation. Please see photos and video for full satisfaction.
