	Overall good cattle to handle, particularly in a paddock. Some cows got a little stirred up when moving through the yards.		
Handled With	Bikes , Dogs , Horses , On foot , Vehicles		

Assessor Comments	Here is a nice line of Droughtmaster cross cows PTIC 2-7 months with only four cows under 4 months of pregnancy. These cows average 473.6kg at assessment. Cows had good quality calves weaned off them two weeks ago and are really starting to freshen up. Cattle are PTIC to Angus bulls (Bowen and Booragul bloodlines). Cows display good frame & depth and were good milky types prior to calf weaning & are great to handle in the paddock. Vet certificate displayed in photos. N.B one cow has a vaccine lump on neck.
