Comment on Fat Score 1 Cattle: Most are score 1's and are fit to travel any required distances.

Vendor Bred: Yes

Stock History: Bred out of a herd of cows best described as Crossbreds. They consist of Brahman cross, Droughtmaster, Brangus and Charbray.

Lifetime Traceable: 100% of cattle in this lot are Lifetime Traceable

Bloodlines: Bred using Charolais bulls over the Crossbred cows. Bulls are from Moongool and Palgrove. Has paid up to $32,000 for Moongool bulls in the past.

Grazing Conditions: Mix of red Box type country with areas of black Gidyea country. A very dry coverage of native grasses and Buffel grass. Also supplemented with M8U.
Returned same

Burr/Seed in Coat: No Burr or Seed of weeds declared noxious observed in the coats at assessment

HGP Status: The owner declares that the cattle have not been treated with HGP at any period of their lives

Health Treatments				
	Vaccinated	17/04/2024	5 in 1	First Dose

Chemical Residue: Clear - No known history.

Eligibilities: PCAS Eligible

J-BAS Score	6
Vendor Comments	These only being sold due to dry conditions (only 9" from a 21" annual rainfall in 2024). Usually retain these to either export feeder weights or as grass fed export bullocks. Slaughter bullocks have averaged 387kgs dressed as 2/4 tooths off grass.

Temperament

Yards	Crush	Paddock
Quiet: 80 head Slightly Stirry: 3 head	Quiet: 81 head Slightly Stirry: 2 head	Temperament not assessed in Paddock

These were excellent to handle in all areas of the yards and the weaning process is obviously a reflection of this. They stood up in the crush very well, only really two that did act up a bit but settled when they returned to the mob. Very easy to video, they just walked out with minimal fuss. Like most cattle they probably need to be steadied through gateways a little but in summary an easy line of steers to handle in all areas of the yards.

Handled With	Bikes , Horses
Assessor Comments	A line of Charolais cross PCAS ELIGIBLE steers that have presented in plain condition from the dry season. I would imagine these will perform very quickly on fresh country that has received some rainfall lately and as a result would expect very good compensatory gains. There appears to be a very light amount of Buffalo Fly on them so a treatment on arrival would be an advantage for maximum production. Definitely no serious problem, no rubbing just some tail flicking. These cattle have an excellent reputation and many feedlots have reported that they are excellent doers. They are capable of continued growth to end up a domestic, export feeder or a grass fed heavy weight bullock. There are maybe 3-4 lightweight steers that look like they may have been self weaned at a young age that may take a bit longer to hit their straps. Buyers there is an additional lot of Angus cross steers from the same place in the sale to make up a 5 deck unit should a buyer purchase both lots.
