Assessor Comments	Taunta 300 Top draft of Merino Wether lambs June/July 2022 drop Average 42.1 kg LW, currently in forward condition and are well grown for their age. The lambs have picked up Geranium seed in their wool on their legs, necks and poll. Buyers are recommended to truck the lambs ASAP to avoid further increase in the seed build up. The lambs would appear to have lice present and would recommend to take precautionary action when arriving home at their destination. Buyers to can put together large lines of one vendor bred one mark lambs. Bred out of Medium to Large framed Watervalley Merino Ewes. The lambs have not been mulesed.
