Assessor Comments	105 predominantly autumn drop EU Angus and Angus x heifers, odd heifer slightly older, These heifers were early weaned as a result of a hard autumn and tough winter but since spring months have started to freshen up and given the right opportunity will continue to go forward, Heifers have alot of compensatory weight gain to be had showing plenty of frame and no condition for age, a good opportunity to purchase heifers that are very well bred, Heifers are bred from a self replacing Ben Nevis and Booroomooka cow herd sired by Booroomooka bulls. tail removed 2 heifers with small warts on muzzel
