Assessor Comments	A line of 140 ewe lambs/hoggets. July/August 2021 drop at 13-14 months old, making around 70% of the animals still being lambs. Approx 30% of the flock are hoggets that have only recently cut teeth. Mulesed and tail-stripped at marking. The property has been a part of the sheepMAP flock since 2005, allowing purchaser assurance when it comes to bio-security and flock health. Vendors are also a One Biosecurity (1B) member. These are the perfect breeding opportunity with Turkey Lane genetics focusing on ASBV's and wool cut which will be seen in the progeny. Surplus to the vendors requirements and normally retained for breeding. All dirty animals will be crutched on delivery.
