Heifers were very good to handle in the yards & crush.

Handled With: Bikes , Vehicles

Notable Traits

	Traits
4 Head	Cloudy Eye/Pink Eye Scarring
1 Head	White markings in front of flanks

Assessor Comments

PTIC Rennylea Angus blood heifers, they are 21-22 months of age, scanned in calf to LBW Rennylea Angus bulls from 6-7 months in calf. These heifers were scanned into the second joining cycle back in January and were retested 17/5/24 prior to assessment to guarantee pregnancy status. These heifers were classed in to be retained within the herd, due to the dry season all naturally mated heifers are now surplus to requirement. They were joined to high indexing Rennylea Angus sires, with the Hearn family targeting bulls with high 400 day growth, high IMF, calving ease, and must have near perfect structure. These heifers will develop into medium/large framed matrons.
