Assessor Comments	Very well bred line of NSM Angus heifers. Heifers represent the 2nd line of classed breeders in the Lerida operation and were not included in the 2024 joining program. Heifers are well grown for their age and are maturing well in a relatively good season. They are soft feminine females and this represents an annual sale for their operation and are equally suited to a breeding program or ideal to feed on. They come from a well regarded operation and are bred from genuine medium to large frame females. They carry a clean bill of health and will continue to perform if shown the correct management and nutrition. Heifers are grassfed eligible. Total of 104 heifers on offer in three groups which will be delivered of even quality if required. Please call for further information
