The heifers have been tailed extensively in the weaning procedure with horse's dogs and motor bike. Mostly they handled well through the pound and up the race and stood calmly in the weigh box how ever there was a few that became agitated these did however settle quickly when back in the mob. The heifers were calm when walking through them in a large yard and taking photos

Handled With: Aerial (Helicopters, gyro's and planes) , Bikes , Dogs , Horses

Assessor Comments: A nice line of light weight number 2 weaner heifers. These are heifers that have enough quality and the rite temperament to be future breeders and or grow out to be very good feeders. They are in healthy store condition and moving forward on good Buffel pasture. There are 13 heifers in the mob that have small horn buds as seen in the photos. Past sales have proven these cattle to perform well wherever they go. they were treated with Dectomax injectable on 25.10.22. and 2 Heifers show fly bite scars on the neck
