Vendor Comments: Annual run of steer calves. They have done well and I'm very happy with their weight for age and their growth.

Calves handled well considering they had just been drafted off their dams and the cows were standing outside the yards bellowing. They blocked reasonably well when drafting, and proceeded through the race and crush with relative calmness. When heavy pressure was applied they got agitated, but nothing more than I would have expected considering the situation at assessment. Note there is 1 red calf in the assessment (329kgs). He can be taken at the sold price or left out at the buyers discretion.

Assessor Comments	A small line of genuine Angus weaners. Showing good weight for age and frame to grow. These calves were impressive for their age, and quickly caught the eye. Appear to be steers that will go on to become solid bullocks.
