These are some of the quietest cattle I have assessed. They virtually had to be pushed out of the way to walk through them. Several heifers resented being mouthed but nothing was flighty or fast in the yard. Very quiet cattle.

Assessor Comments	Presenting a nice lot of Hereford and Poll Hereford heifers properly weaned and ready to take on to breeders or fatten. The majority of these heifers are by the Poll Hereford Rayleigh bull out of Station bred Hereford cows. The heifers are well grown, in store to forward store condition. There are approx 3 heifers showing Bos Indicus traits (see pics), 8 horned heifers and 12 polled. The vendor has done a good job with weaning and educating these heifers as they are some of the quietest cattle I have assessed. Most of the heifers show good length with only the younger ones in the mob still developing their frame. I noticed 2 heifers showing slight pink eye affects of some cloudiness in one eye, not affecting sight or performance. Most have good pigmentation around the eyes. Some smaller heifers were removed at assessment. They weighed 325 kg average after 2 hrs in yards with a low of 263 kg and a high of 384 kg. Note: Their brothers are also being offered this sale.
