Assessor Comments	A truly rare opportunity to acquire some of the cream of the Karoo crop. EU Angus heifers PTIC to the selected Karoo sires for a predicted calving bracket of July/August with these being the earliest calving heifers when the pregnancies were aged by James Sutton early in February. From the pick of the Karoo heifers when selected last year from the 2023 calf drop. Some truly first class females which are showing the scope, scale and phenotype we all strive to breed. An opportunity to put these and another mob of 20 together. A line of heifers that would truly compliment any herd. An opportunity not to be missed
