Assessor Comments	Top quality line of PTIC angus females rising 5-7 yrs of age. They present evenly as a group and range from forward store to forward condition. They are bred from a very good local self replacing angus herd and all progeny are proven performers amongst previous purchasers. Cows were joined for a 8 week period and these cows were identified as later cycling. As a result of this, they should calve in a tight period(2-3 weeks) at beginning of October They stand well on their feet and carry their weight well. Please note vendor offering various lines across two farms with a total of 86 females on offer. Noted one cow with a blue eye
