Assessor Comments	2 Decks of high quality heifers out of the renowned Clea Angus herd. Heifers have had a 10% tail removed and present in forward store condition. Heifers are improving since weaning and represent a good opportunity to secure quality Clea Angus genetics for future breeding or to feed. Heifers have come through weaning well and or improving each day but would benefit greatly to be out of the Monaro winter. Clea Angus have a high focus on growth, fertility, IMF and structure. Clea weaners are purchased each year by Northern backgrounders/feedlots.
