Comment on Fat Score 1 Cattle: All score 1 cattle presented are fit to travel long distances.

Vendor Bred: Yes

Stock History: Bred from very good quality Angus cows purchased as heifers and cows from the New England area of NSW a few years ago. At the time they were assessed as 100% Angus X Angus.

Lifetime Traceable: 100% of cattle in this lot are Lifetime Traceable

Bloodlines: These calves are by an AI son of a Texas Angus bull, Glenisa Angus and a son of an Alumy Creek Angus bull.

Grazing Conditions: Running on an excellent coverage of native summer grasses and good germination of winter herbages underneath.
Returned same

Burr/Seed in Coat: Noted some Noogoora burr in their winter coats.

HGP Status: The owner declares that the cattle have not been treated with HGP at any period of their lives

Health Treatments: Drenched 10/05/2025 Moxilab

Chemical Residue: Clear - No known history

Eligibilities: PCAS Eligible

J-BAS Score	6
Vendor Comments	These are part of an annual turnoff of weaner steers.

Temperament

Yards	Crush	Paddock
Quiet: 108 head	Quiet: 101 head Slightly Stirry: 7 head	Temperament not assessed in Paddock

Steers were very quiet in all areas of the yards. Approximately 7 head did resent being in the crush but they settled down very quickly once they exited the crush and were back with the main mob.

Handled With: Bikes

Notable Traits

	Traits
1 Head	Blue spot in both eyes (example photo attached)
3 Head	Blue spot in one eye (example photo attached)
1 Head	Eye with some slight blight - treated (photo attached)
2 Head	Old cloudy blue eye (example photo attached)
3 Head	Old ring worm scars

Assessor Comments

Buyers, good quality Angus steers bred from females purchased out of the New England area. They present in mainly store to forward store condition and look to be gaining weight on the good quantity/quality feed at their disposal. The steers are very quiet, the vendor's always do an excellent job throughout the weaning process and is reflected in these. All the hard work has been done, they are well and truly over the weaning process, and I suggest these will fly ahead if they get access to improved pastures or oats crops. They possess plenty of length and depth of barrel and don't look to have had any health setbacks at any stage of their life. They are ideal to background to heavier export feeder weights. There are a few with some eye scarring and one steer with a little bit of redness in an eye so as a result he was treated at assessment. Cattle from Wongavale are continually attracting repeat buyers, evidence they must perform.
