These steers mostly handled well through the draft and up the crush and the majority stood quietly on the scales. There were approximately 15 that showed signs of flight but not of aggression these few steers also were happier to stand in the mob when taking photos but were settled and not showing signs of being stressed when with their mates

Handled With Bikes , Dogs , Horses

Assessor Comments A good quality line of brahman and brahman cross steers with all the hard work done they are ready to pack on the weight over this growing season. These fellas are in store condition, in good health and moving forward on fresh feed. They have the quality to be backgrounded for the feeder market or grown out to bullocks. Been mustered and handled with horse's dogs and bikes and have been through the yards a number of times since being weaned. They have always performed well when sold in the past. Treated on 31.10.22 with dectomax injectable. It was observed that 1 steer had small amount of fly bit on his neck, 1 steer has a half tail (in photos) and one steer has rain scald on and around the back of his ear his ear.
