Assessor Comments	Genuine turnoff of 'Dalkeith's' weaner heifers. 15 Vendor Bred heifers, fully weaned and educated - a rare opportunity to obtain a light weight Angus article that has had all the hardwork done. Heifers are the lead portion of weaners and would provide a quality article to be retained as breeders, no heifers have been retained in the herd. Heifers are soft easy doing females with good confirmation of frame and femininity. Due to the wet weather conditions that have consistently been present this year, the weaners were weaned first in August and then branded in mid September. Purchaser can be confident in buying a breeder article that has had every care taken in their vaccination program. Breeder herd is run in a controlled mating program and culled on fertility requirements. Lead Angus weaner heifers averaging 287kg in a 60kg weight bracket. Vendor also has the Angus steer portion available in the same sale and the santa/angus portion of steer and heifer weaners on offer.
