Comment on Fat Score 1 Cattle: All cattle deemed fit to travel at assessment - light score condition steers are more pronounced on the limousin or charolais content in these steers

Vendor Bred: Yes

Lifetime Traceable: 100% of cattle in this lot are Lifetime Traceable

Grazing Conditions: seasonal conditions for 2024 has been favourable and produced a good bulk Mitchell, Flinders Grass, buffel & native herbages currently in a hayed of state, some green in the very base of tussocks

Returned same

Burr/Seed in Coat: No Burr or Seed of weeds declared noxious observed in the coats at assessment

HGP Status: The owner declares that the cattle have not been treated with HGP at any period of their lives

Eligibilities: Russian Eligible Saudi Eligible

J-BAS Score	6
Vendor Comments	A good line of light 100 day feeder weight steers - that are becoming more consistent in type every year.

Temperament

Yards	Crush	Paddock
Quiet: 109 head	Quiet: 98 head Slightly Stirry: 11 head	Quiet: 109 head

Very Good - these steers are well educated and handled with ease with the odd beast observed to be swift gaited and eager to return to pen while in the race.

Handled With: Bikes

Notable Traits

	Traits
3 Head	Fly Bite
1 Head	wart

Assessor Comments

Feed lotters/bullock growers look on here! This is opportunity to secure a very good line of VGQ HGP free vendor bred steers. Backed by their previous years drop taking out the Northern beef producers feedlot competition in 2023 these cattle have been bred to perform. Right in the perfect 100 day feeder weight range these cattle display excellent thickness, length and muscling ability and without a doubt will continue to grow out into high yielding steers with an outstanding carcass. These steers were a pleasure to assess, there are 2 other lots in this sale - a credit to the vendors and their commitment to presenting their cattle. These steers have been sold numerous times on Auctions Plus and have always satisfied buyers expectations. Please Note: 3 steers observed with flybite, 3 steers showing greater than 40% Bos indicus content (1/4 hump). Ideal feedlot weights with a wet curfew weight range of 400 - 500kg @ Assessment.
