	Well weaned and yard trained weaners. Flowed through the yards easily with a few weaners becoming agitated in the crush on the weigh platform but appeared to settle once back with their group. Weaners handled well considering they were being exposed to a new environment with these yards.

Assessor Comments	Offering 226 Yard Weaned Steer Weaners over three lots in two deck loads and split purely on weight off the scales. These steers were bred on the vendors Holbrook property in the South/East slopes of NSW and trucked to their Upper Rollands Plains property in May. Bred out of volume cows principally based on MillahMurrah bloodlines and sired by Dunoon and Mundarlo Angus bulls, these weaners present in their Winter coats in fresh store condition with all frame. Given feed opportunity, these steers are ready to explode and have performed very well in the past, usually taken through to heavy feedlot weights at a young age. Note these steers were treated with Bovilis MH & IBR on 3rd July and vaccine details will be made available to the successful purchaser. Grassfed Only PCAS declaration is available on request. Note photo's and videos are of the entire group of steers with each of the three lots being offered in tight weight ranges to suit all buyers.
