Heifers worked well throughout yards. Occasionally when one moves several others rush off in same direction, only typical of age. The occasional heifer became slightly upset on scales or in force, quickly calming once back in the mob.

Assessor Comments: Buyers a run of 40 Angus Angus cross heifers averaging 285kg at assessment. Heifers should go on and do a great job, whether breed or feed, if given the opportunity. Heifers are out of vendor bred Angus Angus cross cows, some of these heifers show a smooth, loose skin, there are around 14 heifers showing some white on udder, whereas 4 of which have some white on and up to navel. I did observed there was a percentage of heifers with dead hair with clover seed, mainly on bellies and polls. 2 heifer seen with slight ring worm, nothing considered detrimental. Vendor also offering 26 steers in todays sale. Don't forget agent willing to do third party transfer with NLIS free of charge.
