very good to handle, these cattle were weighed on platform scales, most of them stood on the scales calmly and were undisturbed which made assessing them, given the conditions a breeze. the steers have been handled daily by the vendors kids you could just about pat them but moved off easily when required.

Handled With	Aerial (Helicopters, gyro's and planes) , Bikes , On foot , Vehicles
Assessor Comments	A good line of quiet well handled steers neatly processed with all the hard work done being fully weaned and educated for over a month. These cattle are infused with the genetics to perform and are ready to steam ahead on crop or with a wet season on them.
