These females moved freely throughout the yards with one becoming slightly agitated in the weighing process

Handled With	Bikes , On foot , Vehicles

Notable Traits

	Traits
1 Head	Light pink eye scar

Assessor Comments	A rare opportunity to secure leading-edge females direct from the renowned Glen Angus Stud. These quality cows have been naturally joined to The Glen Keystone GMJR123 and are PTIC to TCC late February for 8 weeks. For buyer confidence, all females were re-pregnancy tested in calf on 22/12/25. These females are in the prime of their breeding life, they have all reared their first calf and have re-joined back in calf to the bull with no opportunity to the AI. They display excellent maturity, phenotype and structure, did a fantastic job on their first calf at foot and will be a valuable addition to any progressive Angus breeding program. Cows weigh from 588kg to 744kg, averaging 626kg, curfewed. Please note Angus ID's & Joining sire ID's are in documents. Please note if you require these females to stay APR with the Angus Society there will be a fee of $250 per animal transfer. Also note a total of 130 APR Angus Autumn Calving females are offered in the same sale.
