Assessor Comments	A quality line of Primeline ewe lambs that are a credit to the vendor's long-established breeding program, based on leading Primeline genetics for over 10 years. These ewe lambs have been bred with a strong focus on fertility, growth, maternal performance and structural soundness. Offered scanned empty, these ewe lambs have not joined due to their weight and present purchasers with an excellent opportunity to continue growing them out before joining as well-developed maiden ewes next season. Averaging 42.5kg, they are displaying good frame, length and doing ability, with the potential to develop into highly productive breeding females. Animal health has been well managed, having received two Campyvax vaccinations, 6-in-1 vaccination and an up-to-date drench program. An ideal opportunity to secure genuine replacement breeders from a proven, performance-focused flock.
