Assessor Comments A nice line of EU Angus steer weaners which are bred to perform. Only leading Angus AI sires from both Aust & USA have been used heavily in this herd through AI programs for the last 14yrs, then backed up to Angus bulls from some of our leading Angus studs, Te Mania, Rennylea, Dunoon, Mooganilla and recently Landfall Angus. SUPER quiet, well weaned and handled, ready to take on to heavy feeders or to bullocks. The temperament on these weaned steers is to be commended - Vendor does focus heavily on this trait. Vendor consistently sources leading genetics to take their herd forward ensuring their product is suitable for any area of the supply chain. Steers weighed 221kg - 299kg at assessment. NOTE - steers were given Flunixil pain relief at castration. Odd wort on head and neck of a couple of steers. Vendor has 6 EU Angus weaned heifers - full sisters to these in this sale.
