Assessor Comments	An ideal opportunity to purchase a line of AA steers, which has had a small tail taken out the bottom end. These calves have not been weaned, and will not be prior to delivery. The vendor is selling much earlier than usual, because the season is showing all the signs of closing off early. The calves will present in strong store condition, with some still showing signs of their winter coat.. These cattle have always been very carefully managed for temperament, and that quiet temperament shows in these calves. This is a commercial mob out of the Tooperangus Black Angus stud. These steer calves weighed 192 kg at the time of assessment, and will present in strong store condition. They have been vaccinated with 7 in 1, and Dam drenched through their mothers. Ideal re-stocker steers to put out, grow out, and bring back. Please note: there are also 6 Speckle Park steer calves available, similar weights, to the purchaser, if so desired. Photos and video available upon request.
