Assessor Comments	Buyers a great opportunity to secure a good 2 deck line of Black weaned heifers. These heifers are sired by high priced Gidyea Brangus and Ultrablack bulls out of medium to large framed Brangus and Ultrablack cows. Weaned in March and grazing on the tail end of oats crop , Vendor would normally keep most of these to join however is selling this year due to ongoing dry conditions and the sale of another property. The majority would suit as future breeders and would be an asset to most breeding herds alternativly would be ideal to background for the lucrative Domestic feeder market. Please note five heifers with white markings on face or underbelly. Heifers assessed with horns are only weaner horn and well inside ears, also1 heifer observed with old blight scar in 1 eye. Vendor has 2 more lots sisters this sale.
