Assessor Comments	240 paradoo Prime composite wth lambs. All weighed 35kg - 45.5kg to average 41kg full. Weaned at assessment and gone onto regrowth silage paddocks. Given whats happened in the past month they should put some weight on before delivery. The lambs are out of large frame ewes which weigh 80kg-90kg so the lambs have the genetic potential to grow into export lambs. All animal health is up to date. Some lambs are holding tight in the skins others have dried out. They are normally finished on summer crops at around 24-25kg though this year the ewe lambs will go onto summer crop. Well bred lambs.
