Assessor Comments	350 Merino Ewes. June/July 2025 drop.Croidon bred & blood. Sept shorn. Ave 42 kg. Plain bodied ewes that have done it pretty tough up until 6 months ago so havnt grown out as per usual , since September shearing ewes have improved dramatically and realistically need another month of good feed before joining. The breeding is their , just not the presentation . Ewes will be reserved realistically so a great oppurtunity to get some underdone ewes around ewe. Please ring with any questions.
