Comment on Fat Score 1 Cattle: These steers are fit to load and healthy at assessment. Fit to load guidelines will be followed at delivery. Please note these heifers will remain in the yards on good hay until delivery.

Vendor Bred: No
Vendor has owned stock for 2-6 months

Stock History: Purchased a line of one brand cows and calves and PTIC cows from Western Qld early winter, these being the weaners off those cows.

Lifetime Traceable: 100% of cattle in this lot are Lifetime Traceable

Bloodlines: Purchased as a line of Angus & Santa x cows & calves and PTIC cows from Western Qld. Calves sired by Angus, Ultrablack & Santa bulls.

Grazing Conditions: These steers and their mothers have been grazing in very short dry Buffel and natives with some legume. Very dry seasonal conditions has forced the early weaning/sale of these weaners to give relief to the cow

Returned to: Buyers please note these heifers will remain in the yards on good hay and weaned until delivery.

Burr/Seed in Coat: No Burr or Seed of weeds declared noxious observed in the coats at assessment

HGP Status	The owner declares that the cattle have not been treated with HGP at any period of their lives

Buyers these weaners were a pleasure to draft , assess and handle. As they were purchased as cows & calves from Western Qld in early winter, they have been trucked, travelled and handled extensively in their short lifetime. I have full confidence they will be quiet and easy to handle moving forward. Only a small handful stirred up in the crush when getting the Cydectin needle which is to be expected for a calf fresh off the cow.

Handled With	Bikes , Dogs , Horses , On foot , Vehicles
Assessor Comments	Buyers please consider this line of 44 (1 deck) soft weaned steers. Weighing from 135 - 253 kgs to average 206 kgs at assessment after an overnight dry curfew. These weaners are off a line of quality Western Qld Angus & Santa x cows purchased as units and PTIC cows in early winter this year. Only selling at this age due to the very dry seasonal conditions and to give relief to the cow. These soft steers would make ideal backgrounders for the feedlot market or carry on and finish. They have been pre treated with Cydectin LA injectable to help with movement into tick free areas, they were visually clean of adult tick at assessment. Buyers please refer to my photos and videos as part of my description. They have had extensive handling in their short lifetime and were very good & quiet to handle. Buyers please note the vendor has 44 heifers (1 deck) sisters to these steers in this same sale.
