Handled With Bikes , On foot , Vehicles

Notable Traits

	Traits
8 Head	Very slight to medium ringworm on face/neck of 8 heifers
3 Head	Very slight white markings on udder / underline

Assessor Comments
A nice line of one-mark, beautifully quiet tempered, YAMBA Angus Stud bred, PTIC heifers.These heifers are very well developed, exhibiting good large frames for age, with impressive carcass shape along with softness & stretch in abundance. Heifers are presenting in very fresh, forward condition, putting them in perfect stead to continue growth & development throughout their pregnancy term, whilst not being overdone for calving. Easy doing heifers, which were a pleasure to handle through the yards, due to their quiet nature. These 14 heifers represent the line in a mob of 35 heifers that were Ai'd, which have joined on the second cycle to registered bull, TeMania M1099, selected for low birth weight figures combined with very good growth rates, after failing to fall pregnant through artificial insemination. Heifers are approximately 70 to 100 days in calf, & are set for a late Autumn/early Winter calving. A very attractive, excellent quality line of soft & shapey PTIC heifers, which are well grown, & should continue to develop into lovely, quiet, large-framed young cows. A great opportunity to secure a top quality, one-mark line of young breeders with exceptional breeding & a lifetime of production ahead of them. Please note, a large portion of the mob present with relatively minor ringworm, which will naturally heal over time, & is not affecting their performance in any way. The other line of 21 same mark, Ai'd heifers, which conceived on the 1st cycle are also on offer.
