Temperament

Yards	Crush	Paddock
Quiet: 54 head Slightly Stirry: 4 head	Quiet: 56 head Slightly Stirry: 2 head	Temperament not assessed in Paddock

Heifers were very good to handle in all areas of the yards and also considered quiet when moving from yard to yard. In the crush they were generally quiet even whilst being fitted with an NLIS device. Generally, the temperament is not an issue at all. Buyers should be warned however, most cattle need to be settled down on arrival after a truck trip and in strange surroundings before they are shown the bush gate.

Handled With	Aerial (Helicopters, gyro's and planes) , Bikes , Dogs , Horses
Assessor Comments	Buyers, good quality weaner heifers best described as Composites. These have been bred in light forest type country so anticipate excellent weight gains on better quality heavy developed scrub soil country. Present in plain condition so most likely are mainly self-weaned so buyer should be advised you are not buying "butter balls" that will melt once you purchase them, rather should hit the ground running. Vendor has had great success in the Callide Dawson Carcass Competitions over many years and are doing an excellent job breeding flatback type cattle to suit the domestic supermarket trade. Vendor is a regular user of A+ and we are finding repeat buyers operating on these cattle. Backgrounders advised to buy these and see how they perform, guarantee you'll be back for more. Still await dip sample results from DPI so whilst they are guaranteed clear on farm, interstate buyers to factor in a plunge dip at Moura. Buyers unsure of tick protocols call assessor pre-sale for clarification.
