Comment on Fat Score 1 Cattle: All score 1 cattle presented in plain condition but are fit to travel long distances.

Vendor Bred: Yes

Stock History: Bred from very good quality Angus cows purchased as heifers and cows from the New England area of NSW a few years ago. At the time they were assessed as 100% Angus X Angus.

Lifetime Traceable: 100% of cattle in this lot are Lifetime Traceable

Bloodlines: These calves are by Glenisa, and Ascot bulls and a bull that is an AI son of Texas Global.

Grazing Conditions: Running on a good cover of native summer grasses from excellent recent rainfall activity.
Returned same

Burr/Seed in Coat: Clover and Bathurst burr in the winter coat.

HGP Status: The owner declares that the cattle have not been treated with HGP at any period of their lives

Health Treatments: Drenched 22/09/2023 Cattleguard (pour-on)

Chemical Residue: Clear - No known history

Eligibilities: PCAS Eligible

J-BAS Score: 6

Vendor Comments: The steers with some blue eye scarring were given a spray of Terramycin at assessment. Please see attached photos of

the scarring.

Temperament

Yards	Crush	Paddock
Quiet: 72 head	Quiet: 69 head Slightly Stirry: 3 head	Temperament not assessed in Paddock

Steers were very quiet in all areas of the yards. Approximately 3 head did resent being in the crush but they settled down very quickly once they exited the crush and were back with the main mob.

Handled With Bikes

Notable Traits

	Traits
1 Head	Cloudy blue eye (1 eye)
1 Head	Cloudy blue eye (both eyes)
2 Head	Light wart on head
3 Head	Ring worm scars

Assessor Comments Buyers, a double-deck lot of good quality Angus steers bred from Angus females purchased from the New England area. These are in mainly store condition, bred on lighter country and are just starting to clean up in the coat so I would expect these to provide plenty of compensatory gain and fly ahead if they get access to good quality feed or crop on some heavier country. These steers are very quiet and the vendor's always do an excellent job throughout the weaning process and is reflected in these. These are ideal to background to heavier domestic or export feeder weights. There is a bit of a weight range which is quite common in weaners and is a reflection of the gap in their age of 7-10 months. These don't look to have had any setbacks, it did get dry here back in the winter but were weaned later to give them every chance to grow out. These cattle are attracting repeat buyers so that is evidence they must perform. Time to shop because once the rain comes, they will only get dearer.
