Comment on Fat Score 1 Cattle	These cows are fresh in condition but not carrying too much fat cover. They will handle travelling a long distance in reasonable weather.
Vendor Bred	No Vendor has owned stock for More than 12 months
Stock History	Purchased in as well as a portion of vendor bred cattle.
Lifetime Traceable	100% of cattle in this lot are Lifetime Traceable
Breeding Comments	Sterita North and Granite Ridge Angus genetics.

Grazing Conditions	Phalaris based improved pastures which are still providing value given the time of the year. Returned same
Burr/Seed in Coat	No Burr or Seed of weeds declared noxious observed in the coats at assessment
HGP Status	The owner declares that the cattle have not been treated with HGP at any period of their lives

Health Treatments

Cows Drenched	19/03/2026	Eprinomectin	
Cows Drenched	15/08/2026	Iverlab	
Cows Vaccinated	19/03/2026	5 in 1	Booster

Vendor Comments	Regretful sale of cattle we originally bought in to keep as breeder but due to the unpredictable seasons at Hay they are being sold.
Joining Details	Station Mated bulls put in: 24/08/2026 bulls taken out: 25/11/2026 (94 days) Bull Breed(s): Angus To the vendors best knowledge, this lot has had no access to bulls or stags aside from stated joining period.
Preg Tested?	Yes, this lot was pregnancy tested, by Libby (Vet) on 27/11/2026. 15 Head (40.5%) PTIC, from 2 to 3 months (at time of assessment 25/11/2026). 22 Head (59.5%) NDP (or Not Preg Tested). Certificate Available.
Other Joining Details	These cows will be preg tested on delivery and given the joining conditions we are anticipating the majority to be in calf.

Temperament

Yards	Crush	Paddock
Quiet: 36 head	Quiet: 35 head	Quiet: 36 head
Slightly Stirry: 1 head	Slightly Stirry: 2 head	Slightly Stirry: 1 head

These cows were typical of mature animals to handle. Slightly stubborn but once they were moving they flowed well through the yards. They were settled for the photos and videos as can be proven by the media.

Handled With	Aerial (Helicopters, gyro's and planes) , Bikes , Vehicles

Notable Traits

	Traits
1 Head	Old pink eye scarring - not detrimental to vision.
1 Head	Pink eye conditions are at their peak so a weepy eye is possible by delivery in the calves.

Assessor Comments	Herd dispersal of the AR and TR Booth Angus cows. 5.5 year old cows with a calf at foot and to be preg tested 03/12/26. They have been on agistment at Mortlake since March 2026 and with no improvement in seasonal conditions at vendors property they are being offered for sale. These cows were purchased as PTIC heifers in 2023. With a small portion vendor bred in the line. They were sourced off Hillcrest Pastoral - Lucindale SA off Conkar Downs being Sterita North and Granite Ridge Angus blood originating from a Hereford herd. All of these cows have raised a calf in 2025. They are lighter in condition and giving everything to their calves but have been on the improve since the feed started to grow in August. Calves are estimated to average +140kg and predominantly not yet marked. They have been joined to Tulagi Angus bulls for a late autumn calving. Genetically large framed dams and sires averaging 550kg full these cows still have plenty of weight to gain. The lighter weighted cows in the line are vendor bred and are younger. As these cows have not yet been preg tested vendor will not guarantee 100% are in calf, however joining period and a spring flush should have seen the majority cycling and they will be preg tested prior to delivery as a vet will be on site. A regretful sale of cows that were originally sourced to start a breeding herd that are being sold due to seasonal conditions. Please note vendor is also offering 74 PTIC Angus cows in today's sale.
Assessor	**Henry Booth (Level 1 Accredited)** Phone: 0428 375 816
Delivery Period	03/12/2026 to 05/12/2026 (3 days)
Delivery Point	25 kms west of Mortlake off the Hamilton Hwy. MORTLAKE VIC 3272 Lat: -38.0802538 / Lng: 142.8096955
