Assessor Comments	Herd dispersal of the AR and TR Booth Angus cows. A total of 75 head second calvers to be preg tested 03/12/26. They will be offered as 2 x 37 head to be delivered as a run out the gate. They have been on agistment at Mortlake since March 2026 and with no improvement in seasonal conditions at vendors property they are being offered for sale. These cows were purchased as a complete drop of August/September 2023 born weaners from Wagga Wagga NSW. With a small portion vendor bred in the line. They are based on Hazeldean and Rockwood Angus genetics. All of these cows have raised a calf in 2025 as heifers. They were light in condition through the winter but had calves weaned in August and have improved out of sight. They have been joined to Tulagi Angus bulls for a late autumn calving with their second calf on board. Genetically large framed dams and sires averaging 600kg full these cows are by no means overdone. The lighter weighted cows in the line are vendor bred and calved at 6 months younger. A regretful sale of cows that were originally sourced to start a breeding herd that are being sold due to seasonal conditions. Please note vendor is also offering 37x37 Angus and baldy cows and calves.
