Any Access To Rams or Stags?	To vendor's best knowledge, this lot has had no access to rams or stags.
Assessor Comments	Due to the family farm being leased, the rare opportunity to purchase a magnificent run of mainly 1yr old classed in 1st cross crusader ewes. The Miller family has been using Lambpro genetics for the last 17 years. Primeline ewe mothers were chosen for their naturally plain body traits displaying bare bellies, necks and breach. Ewes are August shorn and have had lambs weaned off them a little over a week ago. Considering this recent weaning the ewes present in remarkable condition and are on the up with their lambs now off them. The management of this ewe flock has been meticulous with animal health treatments a priority, alongside the routine culling of ewes for any feet and udder issues. Any empty ewes at scanning and all dry ewes at marking are also sold with no second chances allowed. This should give buyers confidence that these ewes have successfully raised a lamb every year. These are very fertile ewes as well with the flock scanning average siting around 150-170% annually. This particular mob has weaned lambs at 158%. . These ewes are the result of joining carefully selected crusader rams which are full shedders, while still displaying the positive meat traits and fertility of their Primeline counterparts (2 rams available to purchase) Please note these ewes are Lambpro Certified, and their progeny would be Willowbend Eligible, for Lambpro members These ewes are in the prime of their lives and are an excellent opportunity.
