Unmarked males that have had no handling until being yarded November 2022. They generally flowed well through yard, race and crush but as expected odd few got agitated in crush. Most trotted out but soon settled once back with the mob. Found the majority were flighty out in the yard but none showed aggression. Should settle with more handling.

Handled With: Aerial (Helicopters, gyro's and planes) , Bikes , Dogs , Horses

Assessor Comments: These entires have been in the yards for an extended period of time in very warm conditions running with at least 700 other cattle before assessment. Expect they would not have had full access to an abundance of feed and water during that time due mainly to the large numbers in the yard. Now that they have been thinned out into a separate yard, I would envisage a positive weight adjustment of about +3% on delivery from assessed weights. Found there to be 8 bulls over 300kgs, balance 180/300kgs. 68 head show horn, mostly weaner horn with a small number greater than 4 inches as can been seen in photos and video. Would make excellent steers once processed and on good feed. Consider these good medium/large frame with plenty of potential but will need some more handling. Vendor will guarantee that these will scratch clean if going into tick free areas. Scratch and associated costs will be at the purchasers expense however if they fail the scratch vendor will pay for all clearing costs.
