A credit to the vendors for the temperament of these steers. Even when steers were in a confined space of the crush they showed very little fuss. Very quiet cattle to handle in the yards.

Assessor Comments On offer is a very good quality line of 64 EU Droughtmaster steers 10.5 to 13.5 months of age with exceptional temperament. Steers have been bred in Western Queensland which is currently enjoying a very good season. Steers stand on good bone and have plenty of stretch to continue to put kilos on to maximise the purchasers profits. Steers are very tidy around the head with no horn noted. Previous purchasers have commented on the quality and the temperament of the "Cooladdi Park" steers as they will not disappoint any purchaser, they have a reputation to perform. The majority of the steers were weaned in June with the latest weaned in August. Steers have had a full weaning programme comprising yard fed on hay and weaner ration, turned out into paddock and mustered back to yards each afternoon and worked through yards applying low stress stock handling. Weight range of 295 to 404kg to average 339kg curfewed.
