Vendor Comments	These are part of a normal annual turnoff. These were very good to handle on horses whilst mustering for assessment. These are just starting to hit their straps now that it has rained. We have tried to offer in as tight a weight range as possible.

Temperament

Quiet: 86 head Slightly Stirry: 10 head	Quiet: 90 head Slightly Stirry: 6 head	Temperament not assessed in Paddock

These were very good to handle in all areas of the yards. They marched up the race very well and most were steady on the weighing platform, a few jumped about a fraction. They were also good to handle in the bigger yards but like all cattle need to be steadied through gateways and stood up well during photographing. Buyer advised to settle these steers on arrival before letting them go out of the yards. These are very good to handle on horses in the paddock.

Handled With	Bikes , Dogs , Horses
Assessor Comments	Buyers, here is a B-Double (96) PCAS ELIGIBLE yearling steers that have been drafted into a reasonably tight weight range. Present in mainly store condition they will offer buyers great compensatory weight gains when introduced to crop, grass or grain. Note they also had a big sweat in the yards prior to assessment further emphasizing compensatory gain. There is plenty of frame just no condition so it shouldn't take long to get them to heavier export feedlot entry weights or take all the way to bullocks off crop. Steers once again exhibit softness, good bone, length, depth of barrel and weight for age considering the dry seasonal conditions up until the end of October, they look to be on the move now. The vendors are not frightened to spend money on the right genetics, always looking to move their herd forward and not just mark time. Steers don't look to have suffered any setbacks at any stage. We are receiving excellent feedback from past buyers about their performance.
