Assessor Comments	A neat B Double load of EU feeder steers right in the dress circle. These steers have historically been sold through the CTLX Blue Ribbon Weaner sale where they have long been one of the feature lines. Due to a change in tact and calving date they are now being retained through to feeder weights. Have been grazing highly improved rye grass crops throughout spring and really have started to fly over the last couple of weeks. As noted in the assessment they have been double vaccinated with Bovilis MH+IBR to suit most yard requirements. Please note the extended delivery period given to suit your induction schedule. If this needed to be varied happy to work in. You will be hard pressed to find better load of feeder steers this week - moderate in weight and perfect in condition. Worthy of very close consideration.
