Cows worked well through the yards with a few becoming agitated in the crush or confined spaces but settled once returned to the mob, typical of Western Brahman cows. Cows were observed walking to yards and appeared to be settled and good to handle

Handled With: Aerial (Helicopters, gyro's and planes) , Bikes , Dogs , On foot

Assessor Comments: Buyers a very good line of Brahman cows doing a great job on their USDA,NOP ORGANIC crossbred calves. These cows are genuine breeder cows all middle aged and showing good bone, length & depth and the quality to be an asset to most breeding herds. Their calves are best described as flat back types suiting all southern feedlot markets with the exception of 4 calves showing more Brahman content, calves all sired by Angus, Red Angus and Santa bulls. These cows are a true 3 in 1 package being rejoined to Angus composite Bulls since calving and given the condition of cows and the season would expect to be a good percentage back in calf. Please note 2 cows had a scar on hip from old injury (definetly not capped hip) not considered detrimental. Most cows deemed to have horns are predominately short horn due to bad dehorning as calves please see photos to satisfy yourself. Vendor has 6 cows out this mob that have lost a calf but expected to be in calf available to fill 4 decks if required.
