Comment on Fat Score 1 Cattle	Heifers are forward store to light prime condition and no issues with travel are anticipated if normal sensible travel procedures are followed.
Vendor Bred	Yes
Stock History	Vendor bred at Fog Creek or Clareborough Stations, Richmond or Salisbury Creek.
Lifetime Traceable	68 out of 69 are LT. One heifer in the database is not LT but is vendor bred and on the S/Creek Pic.
Bloodlines	Predominantly Gyranda or Kilterry Stud Santa bulls over Santa cross and Droughmaster cross cows.
Grazing Conditions	Grazing very good quality native and improved pastures. Returned same
Burr/Seed in Coat	No Burr or Seed of weeds declared noxious observed in the coats at assessment
HGP Status	The owner declares that the cattle have not been treated with HGP at any period of their lives
J-BAS Score	6
Joining Details	Station Mated bulls put in: 01/11/2021 bulls taken out: 27/01/2022 (88 days) Bull Breed(s): Registered Angus Bull IDs: Mooroobie Angus Reality R4 (QBPR4) and Mooroobie Enhance R23 (QBPR23) To the vendors best knowledge, this lot has had no access to bulls or stags aside from stated joining period.
Preg Tested?	Yes, this lot was pregnancy tested, by Dr Tim McClymont - Roma Vet Clinic (Vet, NCPD ID: 1262) on 22/03/2022.

69 Head (100%) PTIC, from 2 to 5 months (at time of assessment). Certificate Available.

Other Joining Details Results from Preg Test - 2 x 2 months, 12 x 3 months, 41 x 4 months, 14 x 5 months

Frame		Quality Grades		Store Condition	
Large	78%	Very Good	68%	Fwd Prime	25%
Medium	22%	Good	32%	Fwd Store	75%

Temperament

Yards	Crush	Paddock
Quiet: 68 head Slightly Stirry: 1 head	Quiet: 59 head Slightly Stirry: 10 head	Temperament not assessed in Paddock

The heifers were good to very good to handle in the yards and through the crush. Ten head were slightly agitated in the crush during preg testing. In the bigger yard they moved nice and quietly as a mob but the buffalo fly on the cattle made them uncomfortable when standing still.

Handled With Bikes , Dogs

Assessor Comments A line of mostly good to very good quality, medium to large frame heifers. The heifers have been joined to Angus bulls and have been PTIC as 2 - 5 months in calf with 55 head four to five months in calf. The Angus bulls are from Mooroobie Angus stud (2021 sale - lot 30 and 31) and their EBV data including birth weight is attached. The heifers are all vendor bred at either the vendors property in the Richmond district or at Salisbury creek. They are not culls but rather they are for sale as they are considered a little too soft for the vendor's breeding country north of Richmond. The heifers had a liveweight range of 340 to 518kg full weight and are moving ahead on good feed. Two heifers noted with slight blue eye scarring in one eye. Buffalo fly was present on the cattle and two heifers had bite marks and scaring on neck and shoulders. The heifers were generally very good to handle in the yards and crush and should continue to grow onto good quality medium to large frame breeders.
