Assessor Comments	17 breeder cows rising 3-6 years and PTIC for a tight spring calving. This line represents classed breeders females that offer years of production. These cows have conceived towards the end of the joining period and as a result are being sold to tighten up the main calving. These cows were PTIC by Tom Graham on the 08/02/22 and identified as being 6-8 weeks in gestation at that time. The sires joined to these cows were Hicks Composites and Blue - E (refer assessment for bull id's). Please not 1 cow has a cloudy eye as the result of pink eye scarring (refer photo). The cow missing a management tag was mouthed and has fresh full mouth. A trade opportunity or an ideal article to add to your herd. Offering the added reassurance given that they have all calved before.
