Assessor Comments: 14 large frame Angus cows PTIC 2-4 months in calf to Karoo Angus bull. Predominately younger cows between 3-6 yo out of the Keringa Angus stud, females that have done an exceptional job as recip cows in stud program. Detected later in calf at preg testing and put in sperate line. They are excellent mothers, very quiet, large frame, long, deep bodied cows that present in excellent condition. There is the odd faint blue eye from old scarring in mob. Overall a really nice line of females in calf to high indexing sire. Please note vendor has another line of 28 in sale.
