	Steers were settled in bigger yard when left alone, as soon as people entered yard 2 steers became unsettled and moved away from yardman which then caused the balance of the steers to become unsettle. Steers flowed through yards well while being assessed but tended to rush through gate ways. 4 steers were noted to be quiet in race and crush. When photos were being taken steers tended to trot away from camera and not stand. Please note; not suitable for hobby farmers.
Handled With	Bikes
Assessor Comments	Buyers a great opportunity to purchase a line of Weaned Speckle park cross steers that averaged 325kg at assessment with a -5% curfew (12 steers 310-419kg full). Cattle that have plenty of frame and depth that would be ideal for the domestic or export feedlot market or to retain and fatten as bullocks. Please note; Temperament comments.
